Art Unit: 1644

1. Claims 1, 3-16, 18-21 and newly added claims 22-33 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3-16 and 18-21 and newly added claims 22-33 stand rejected under 35 U.S.C. § 103(a) as being unpatentable over Evans et al. (17 on the IDS), in view of Yamashiro et al. (49 on the IDS), all of record for reasons set forth in Paper Nos. 10 and 14.

Applicant's arguments filed 7-28-2003 have been fully considered but are not found persuasive.

Applicant argues on page 14 of their response filed 7-28-2003, that an artisan would expect PEG to increase cAMP levels as taught by Yamashiro et al., and thus to decrease expression of the reporter gene as shown by each of the references in Tabs 1-10 and since this expected result is the opposite of that recited in the claims, a reasonable expectation of success is lacking.

However, in reviewing the prior art the Examiner is required to consider the closest prior art for a determination of expectation of success. The closest prior art is Evans et al. Evans et al., discloses that in CHO-Rluc cells the levels of cAMP generation were directly correlated to the level of gene expression detection by a luminometer. So there was a reasonable expectation that as PEG increased cAMP levels, this increase would lead to increased gene expression in CHO-RLuc cells.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
